Phone (717) 824-3310

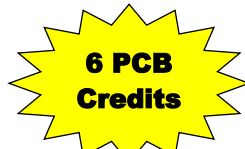

## Addiction is a Family Disease

**Workshop Goal:** Participants will learn how one person's addictive behavior impacts the whole family. They will learn that family members assume roles and adopt unhealthy ways to cope.

**As a result of this training, participants will be better able to:**

1. dramatize what a clergy-member says or does when a family member approaches him or her for help with the addictive behavior of a loved one that will be helpful or harmful;
2. describe the different characteristics and family relationships of healthy and unhealthy families;
3. distinguish between care-taking and care-giving behavior;
4. create a genogram of one's one family, display and explain it to the group or presenter;
5. participate in a family member support group modeled; and
6. explain the disease model.

Supported by...

Lancaster Drug & Alcohol Commission  
PA State Opioid Recovery Program
